GRAYSEN WOODS OUTDOOR STRUCTURES - "The foundation of your outdoor dream room"

Create the perfect fit with Graysen Woods Outdoor Islands, Gas Firepits and Fireplaces.

Graysen Woods outdoor structures are factory built to exact specifications and designed with your choice of outdoor cooking or fire feature accessories.

The Graysen Woods Advantage - Built to last a lifetime

- Lightweight
- Durable: won't bend, twist, rust or rot
- Formed from square tube aluminum
- Fully welded
- Faced with weatherproof outdoor sheathing
- Resistant to: Fire, Mold & Mildew, Insects, Moisture, Freeze/Thaw

Step 1 - Concept

Provide your Graysen dealer with a simple drawing of your outdoor project.

Step 2 - Develop

Graysen Woods creates a CAD blueprint on all customer projects for approval. Technical guidance on features and design are provided at this time to ensure your concept meets your dream. Your outdoor structure will be manufactured to exact specifications- no guesswork- to ensure your choice of appliances is an exact fit.

Step 3 - Manufacture

The frame for your outdoor structure is manufactured to your specifications with fully welded square aluminum tubing, and then covered with fire and water resistant outdoor sheathing, so it is ready to finish in slate, stone, brick or stucco.

Step 4 - Delivery and Set up

The unfinished outdoor structure is delivered to your site and installed. It is light weight yet rigid and is easily leveled, plumbed and secured in place - by design it carries a lifetime craftsmanship warranty.

Step 5 - Finish

Once installed you choose the top and side finish materials to be applied by your dealer or contractor. With Graysen Woods your outdoor structure can be finished to match the décor of the rest of the home creating a seamless path from indoors to your own personal outdoor oasis. Once the finish materials are applied the appliances of your choice are installed.

Features & Options:

Welded Aluminum

No rusting, rotting, cracking or bending like inferior designed products made of steel, concrete blocks, metal studs or treated lumber.

Factory Construction

Offers the ability to create your own personal "unique" design easily accommodating curves or other "odd shapes". Cut out's for appliances are built to exact fit at the factory.

Lined Cabinets (optional)

For added convenience making outdoor storage areas easy to clean and organize.

Acceptable Finish Materials

Outdoor Kitchens

Outdoor Kitchens are a must-have in outdoor room design if you love entertaining friends and hosting parties. Combine the open air ambiance of your backyard with the convenience of a modern kitchen and you have the recipe for an outdoor dream room that can be enjoyed year around!

Whether your project is big or small, from your inspiration we will be able to create custom islands that will exceed your expectations.

Firepits

A firepit in your backyard transforms the ordinary to the magical. A firepit creates a centering point where the time spent together with friends and family is beyond words. When the sun sets and your outdoor gathering is winding down, firepits are the “next” for your outdoor experience.

Choose from standard sized Graysen Woods firepits or let your imagination run wild and we will create a custom firepit to your specifications.

Graysen outdoor firepits are designed for the safety and convenience of gas fired burner systems designed for outdoors. They are not meant to be used for wood fires.

Fireplace Enclosures

A backyard living room is not complete without a Graysen Woods outdoor fireplace enclosure custom designed to fit certified outdoor gas fireplaces. Graysen Woods outdoor fireplace enclosures are constructed with strong, welded aluminum frames and field-tested outdoor sheathing. Since fireplace frames are custom built to your specifications nearly any size and shape is possible. Work with a Graysen woods dealer or your contractor to create the finishing touch to your outdoor room.

With Graysen Woods customized fireplace enclosures the only limit to your design is your imagination.

Graysen Woods

Outdoor Collection

Graysen Woods Outdoor Structures! Don't settle for mass produced islands, firepits or outdoor fireplaces built with poor quality appliances. Rather than live with "one size fits nothing" choose a Graysen Outdoor structure and have it finished to match your existing home features and colors. Factory engineered and built to exact specifications Graysen Outdoor Structures are created from your very own personal design. Graysen Woods saves you money - by finishing the structure onsite you avoid shipping damages and high shipping costs and perhaps the most important point.....when it is finished it is exactly as you desire.
